DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 13 and 27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 13 is indefinite the language “for use in conjunction with equipment” is indefinite, as an apparatus claim can not claim a step of using.

Claim 27, the language “when depend on claim 23 is confusing as it is unclear exactly which claim it depends from.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 14-20, 26, 28, 31-36 are rejected under 35 U.S.C. 102(b) as being anticipated by US 5570744 to Weingarten et al.

The decelerating means is anticipated by baffle-type separator means shown in Figs 3 and 4 which function as slowing down the fluid flow through the tubing so as to achieve fluid separation. The language “formation” is anticipated by the helical flight which has specific form. The passage on the helical flight has constant inclined dimension.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 21, 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over by US 5570744 to Weingarten et al.

The specifics in the angles of the spiral portion of the passage is considered an obvious design options and hence fail to render patentable distinction over the '744 reference, since it has been held that a limitation of the claimed combination which present no novel or unexpected result over a similar feature used in the prior art references, and solved no stated problem, was merely an obvious matter of design choice within the skill of the art. [**In re Kuhle**, 526 F2d 523; 188 USPQ 7 (CCPA 1975). **In re Gazda**, 42 CCPA 770; 219 F2d 449; 104 USPQ 400 (1955)].

Allowable Subject Matter

Claims 4-12, 23, 24, 29, 3037, 38, 40 and 41 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
